

Presentations sorted by First Author Surname

Session	Paper ID	Authors	Title
3	147	Dzhuma Abakarova, Khalil Iskarous and Aude Noiray	Articulatory strategies and coarticulatory patterns across age
7	190	Defne Abur, Joseph Perkell and Cara Stepp	Effects of Vocal Effort on Respiratory and Articulatory Kinematics
1	191	Mohammed Salah Al-Radhi, Tamás Gábor Csapó and Géza Németh	conTTS: Text-to-Speech Application using a Continuous Vocoder
5	208	Jalal Al-Tamimi and Pertti Palo	Quantifying gradience of epilaryngeal constriction in Levantine Arabic "gutturals": A Generalized Additive Modelling approach to ultrasound tongue contours
5	213	Jalal Al-Tamimi, Matthias Heyne and Donald Derrick	From SS-ANOVA to GAMMs: Accounting for within and between-subject variation using generalized additive mixed models on ultrasound tongue contours
1	229	Noor Al-Zanoon, Jacqueline Cummine, Caroline Jeffery and Daniel Aalto	Is styloglossus critical for tongue elevation? A computer simulation investigation of styloglossus recruitment in tongue elevation
5	99	Nuno Almeida, Samuel Silva, António Teixeira and Conceição Cunha	Collaborative Quantitative Analysis of RT-MRI
5	94	Anusuya P K, Aravind Illa and Prasanta Ghosh	A data-driven phoneme-specific analysis of articulatory importance
9	127	Sarah Bakst and Caroline Niziolek	Error detection and correction in L1 and L2
2	106	Pierre Baraduc and Pascal Perrier	Tongue motor control stability: integrating feedback, dynamical internal representation and optimal planning
3	132	Fábio Barros, Samuel Silva, Luciana Albuquerque, Ana Rita S. Valente, António Teixeira, Paula Martins and Catarina Oliveira	Towards the use of ultrasonography to study aging effects in vowel production
9	22	Martijn Bartelds, Caitlin Richter, Mark Liberman and Martijn Wieling	Measuring foreign accent strength using an acoustic distance measure
2	29	Roosbeh Behroozmand, Leonardo Bonilha, Chris Rorden, Gregory Hickok and Julius Fridriksson	Impaired Efference Copy Mechanisms of Speech in Post-Stroke Aphasia and the Role of Dorsal Stream Network
2	21	Nina R Benway, Tara McAllister, Elaine Hitchcock and Jonathan L Preston	Comparing Biofeedback Types for Children with Residual Speech Production Errors on /ɹ/
10	124	Reed Blaylock	Time to target attainment in singing and speech
4	215	Judit Bóna, Veronika Svindt and Ildikó Hoffmann	Voice onset time of Hungarian voiceless plosives in Multiple Sclerosis
3	95	Angéline Bourbon and Anne Hermes	Have a break: Aging effects on sentence production and structuring in French
1	36	François-Xavier Brajot	Sources and interactions of long-term phonatory instabilities
2	120	Dan Cameron Burgdorf	Compensation for Altered Feedback in Vowels and Glides
7	77	Ian Calloway	An analysis of the articulatory factors contributing to perceptual asymmetry
6	13	Christopher Carignan, Núria Esteve-Gibert, Hélène Løevenbruck, Marion Dohen and Mariapaola D'Imperio	Alignment of head nods in French focus: an EMA study

2	182	Elizabeth Casserly, Anna Barnes and Lauren Barrett	Speech intelligibility decreases with degradation of somatosensory feedback via topical benzocaine application
2	133	Gregg Castellucci, Christopher Kovach, Hiroyuki Oya, Jeremy Greenlee and Michael Long	Dynamics of cortical activity underlying interactive language use
7	173	Yueh-Chin Chang, Feng-Fan Hsieh, Song Jiang, Jing Huang and Tzu-Hsuan Yang	How retroflex apical vowels can be suffixed with the rhotic suffix in Mandarin dialects
9	74	Yung-Hsiang Shawn Chang	An articulatory investigation of Mandarin speakers' production of English /r/
2	110	Sara-Ching Chao and Ayoub Daliri	Contributions of performance and prediction errors in speech motor learning
5	161	Wei-Rong Chen, Mark Tiede and D. H. Whalen	DeepEdge: automatic ultrasound tongue contouring combining a deep neural network and an edge detection algorithm
8	211	Shuwen Chen, D.H. Whalen and Peggy Pik Ki Mok	Articulatory and acoustic features of Mandarin rhotics: an ultrasound study
9	57	Hung-Shao Cheng, Matthew Masapollo, Christina Hagedorn and Adam Buchwald	Gestural coordination in non-native onset clusters: An electromagnetic articulography study
5	91	Yujie Chi, Kiyoshi Honda, Zhao Zhang and Jianguo Wei	Comparison of External Photoglottogram and Electroglossogram
6	102	Ioana Chitoran, Giuseppina Turco and Hiyon Yoo	Durational effects of boundaries in Italian fricatives
7	150	Chenhao Chiu, Bo-wei Chen and Yining Weng	Vowel acoustics and tongue postures across different head angles
6	239	Una Chow	Acoustic correlates of question-final Cantonese tones
8	240	Caroline Crouch, Argyro Katsika and Ioana Chitoran	Sonority, order, and overlap in Georgian syllable onsets
5	188	Tamás Gábor Csapó, Kele Xu, Andrea Deme, Tekla Etelka Grácz and Alexandra Markó	Transducer Misalignment in Ultrasound Tongue Imaging
8	139	Conceição Cunha, Samuel Silva, António Teixeira, Nuno Almeida, Jens Frahm and Arun Joseph	First Results of an RT-MRI study on the influence of context in the synchronization of European Portuguese nasal vowels
10	224	Aleksandra Cwiek and Susanne Fuchs	Hand-mouth coordination in a pointing task requiring manual precision
3	137	Daria D'Alessandro, Angéline Bourbon and Cécile Fougeron	Effect of age on rate and coarticulation across different speech-tasks
10	7	Kimberly Dahl and Cara Stepp	Relative fundamental frequency under increased cognitive load in healthy speakers
2	46	Mohammad Darainy, Brian Liu and David Ostry	Somatosensory Cortex Involvement in the Consolidation of Speech Motor Learning
9	61	Lisanne de Jong and Martijn Wieling	Using ultrasound tongue imaging to improve L2 English pronunciation in Dutch students
8	35	Andrea Deme, Márton Bartók, Tamás Gábor Csapó, Tekla Etelka Grácz and Alexandra Markó	Acoustic and articulatory vowel variation as quality shift and increased variance in anticipatory and carryover vowel-to-vowel coarticulation
7	233	Didier Demolin	Speech embodiment and non-pulmonic consonants
8	172	Didier Demolin, Sergio Hassid and Shi Yu	Effects of glottal impedance on subglottal pressure: evidence from voiceless aspirated, non-aspirated and ejectives stops

6	236	Christian DiCanio and Jared Sharp	Initial weakening in Mixtecan Languages?
1	82	Ioannis Douros, Chrysanthi Dourou, Yu Xie, Jacques Felblinger, Karyna Isaieva, Pierre-André Vuissoz and Yves Laprie	Synthesize MRI vocal tract data during CV production
5	81	Ioannis Douros, Yu Xie, Chrysanthi Dourou, Jacques Felblinger, Karyna Isaieva, Pierre-André Vuissoz and Yves Laprie	Vocal tract sagittal slices estimation from MRI midsagittal slices during speech production of CV
5	126	Amélie Elmerich, Angélique Amelot, Shinji Maeda, Yves Laprie, Jean-François Papon and Lise Crevier-Buchman	F1 and F2 measurements for French oral vowel with a new pneumotachograph mask
5	45	Donna Erickson, Oliver Niebuhr, Wentao Gu, Ting Huang and Puyang Geng	The MARRYS cap: A new method for analyzing and teaching the importance of jaw movements in speech production
7	65	Donna Erickson, Sayoko Takano, Yongwei Li, Jaiyin Gao, Shigeto Kawahara, Kerrie Obert, Kyoko Takahashi and Masato Akagi	Source and filter contributions to voice quality differences
8	209	Donna Erickson, Jihyeon Yun, Jiayin Gao and Kerrie Obert	Interaction between phonation mode and pharyngeal narrowing: A pilot EGG study
5	234	Matthew Faytak, Scott Moisik and Pertti Palo	The Speech Articulation Toolkit (SATKit): ultrasound image analysis in Python
4	38	Barbara Gili Fivela, Sonia Immacolata d'Apolito and Giorgia Di Prizio	Labialization in Italian Dysarthric Speech by Parkinsonian Speakers
4	125	Graham Flick, Florencia Assaneo, Joan Orpella and Eric S. Jackson	Temporal Dynamics of Stuttered Speech
9	198	Anna Maria La Franceschina	The role of segmental and suprasegmental information in the perception of foreign-accented English by native and non-native speakers
4	231	Mona Franke, Christopher T. Kello, Philip Hoole and Simone Falk	Temporal organization during oral reading in children and adolescents who stutter
10	84	Matthias K. Franken, Robert J. Hartsuiker, Petter Johansson, Lars Hall and Andreas Lind	Sense of agency is flexible during speech production
2	169	Saul A. Frankford, Shanqing Cai, Jason A. Tourville, Alfonso Nieto-Castañón, Matthew Masapollo, Elizabeth S. Heller Murray and Frank H. Guenther	The Neural Circuitry Underlying the “Rhythm Effect” in Stuttering
6	202	Isabelle Franz, Christine Knoop, Gerrit Kentner, Sascha Rothbart and Winfried Menninghaus	Syllable prominence and prosodic phrasing in spoken prose
2	153	Jessica Gaines, Hardik Kothare, Inez Raharjo, Kamalini Ranasinghe, Richard Ivry, Benjamin Parrell, Zarinah Agnew, Srikantan Nagarajan and John Houde	State feedback control model can account for differences in abnormal pitch perturbation responses in Alzheimer’s disease and cerebellar ataxia
5	195	Jessica Gaines, Kwang Kim, Benjamin Parrell, Vikram Ramanarayanan, Srikantan Nagarajan and John Houde	Discrete constriction locations describe a comprehensive range of vocal tract shapes in the Maeda model
4	60	Emily Garnett, Ho Ming Chow, Megan Sheppard, Gregory Spray and Soo-Eun Chang	Effects of HD-tDCS on speech fluency in adults who stutter: a randomized controlled trial
4	166	Maeva Garnier, Anneke Slis, Christophe Savariaux and Anaïs Da Fonseca	Physiological continuum of atypicality between fluent and stuttered stop consonants
6	165	Maeva Garnier, Marine Barbé, John Smith and Joe Wolfe	Tuning of vocal tract resonances in shouted voice
6	170	Christopher Geissler, Jason Shaw, Mark Tiede and Fang Hu	Eccentric C-V timing across speakers of diaspora Tibetan with and without lexical tone contrasts
1	168	Marc-Antoine Georges, Pierre Badin, Julien Diard, Laurent Girin, Jean-Luc Schwartz and Thomas Hueber	Towards an articulatory-driven neural vocoder for speech synthesis
3	167	Mark Gibson, Ferenc Bunta, Charles Johnson and Miriam Huárriz	The development of syllable timing by children with cochlear implants and their peers with normal hearing.

9	177	Crystal Gilbert, Beckie Dugailard, Marianna Krivoshaev and Laura Spinu	Differences in Articulatory Skill Between Monolinguals and Multilinguals of Different Backgrounds: An Acoustic Study of Tongue Twisters
3	26	Mária Gósy	Temporal patterns of Hungarian words across childhood
8	212	Tekla Etelka Grácz, Tamás Gábor Csapó, Andrea Deme, Kornélia Juhász and Alexandra Markó	Tongue root position in VC sequences with regard to the phonetic realisation of obstruent voicing: A preliminary study on Hungarian
1	9	Matti Groll, Victoria McKenna, Surbhi Hablani and Cara Stepp	Formant-estimated vocal tract length and extrinsic laryngeal muscle activation during modulation of vocal effort in healthy speakers
10	221	Anna Gutnyk, Oliver Niebuhr and Wentao Gu	The Role of Audience Gender in Giving Product Presentations
9	199	Rawan Hanini, Mariagrazia Sciannantena, Michelle Ciccone and Laura Spinu	A Comparison of Geminate Attrition in the Speech of Arabic and Italian Immigrants Living in the United States
8	79	Sarah Harper	Variability of articulatory dimensions relates to their role in distinguishing phonological categories for individual speakers
8	48	Ivy Hauser	Vowel coarticulation with alveopalatal sibilants in Mandarin
8	52	Anne Hermes, Reinhold Greisbach and Ioana Chitoran	Probing the limits of coordination: Word onset clusters in Georgian
8	53	Anne Hermes, Sam Tilsen and Rachid Ridouane	Cross-linguistic timing contrast in geminates: A rate-independent perspective
9	204	Sadao Hiroya and Takemi Mochida	Formant-altered auditory feedback on non-native vowel production
2	227	Joy Hirsch, Mark Tiede, Adam Noah and Xian Zhang	Neural and acoustic characteristics of agreement vs. disagreement in dyadic debate observed using fNIRS hyperscanning
3	128	Elaine R. Hitchcock, Laura L. Koenig and Laura Ochs	Exploring voice onset time, place of articulation, and vowel context in children
9	4	Claire Honda, Annie Gilbert, Natalie Phillips and Shari Baum	Electrophysiological correlates of lexical stress perception in bilinguals
8	33	Philip Hoole, Stefano Coretta, Christopher Carignan, Esther Kunay, Arun Joseph, Dirk Voit and Jens Frahm	Control of larynx height in vowel production revisited: A real-time MRI study
9	179	Feng-Fan Hsieh and Yueh-Chin Chang	Beyond Simplex and Complex: Gestural coordination in L2 English
5	93	Aravind Illa and Prasanta Ghosh	Complexity-performance trade-off in acoustic-to-articulatory inversion
5	85	Karyna Isaieva, Yves Laprie, Alexis Houssard, Jacques Felblinger and Pierre-André Vuissoz	Tracking the tongue contours in rt-MRI films with an autoencoder DNN approach
2	11	Takayuki Ito, Jiachuan Bai and David Ostry	Relationship between sensory memory and speech motor learning
8	119	Rion Iwasaki, Kevin D. Roon, Jason A. Shaw and D. H. Whalen	Lingual articulatory evidence of Japanese devoiced vowels: /u/ still there?
4	73	Jidde Jacobi, Teja Rebernik, Roel Jonkers, Ben Maassen, Michael Proctor and Martijn Wieling	Characterizing tongue tremor in Parkinson's disease using EMA
4	92	Milica Janić, Teja Rebernik, Pauline Veenstra, Emma Wissink, Martijn Wieling, Michael Proctor	Vowel production in congenitally blind and sighted Australian English speakers
4	56	Alicia Janz, Simon Wehrle and Martine Grice	Effects of unexpectedness on turn-transitions in adults with Autism Spectrum Disorder

5	25	Riwei Jin, Xi Peng and Brad Sutton	Shortening total acquisition times for high speed dynamic speech magnetic resonance imaging using temporally sparse navigation
3	49	Heather Kabakoff, Olesia Gritsky, Joanne Jingwen Li, Samantha Ayala, Elaine R. Hitchcock, Jonathan L. Preston, Daphna Harel, Douglas M. Shiller and Tara McAllister	Tracking development of somatosensory acuity: Age-based comparison of three measures
4	203	Heather Kabakoff, Graham Tomkins Feeny, Daphna Harel, Mark Tiede, Jonathan L. Preston, D.H. Whalen and Tara McAllister	Characterizing Sensorimotor Profiles in Children with Residual Speech Errors
10	141	Jeffrey E. Kallay, Ulrich Mayr and Melissa A. Redford	The Role of Narrative Coherence on Speech Motor Planning
1	163	Jaekoo Kang, Hosung Nam and Whalen D. H.	Modeling the null space of speech production using flow-based Invertible Neural Networks
2	136	Robin Karlin, Chris Naber and Benjamin Parrell	Auditory feedback is used for both online and adaptive control of timing in speech
6	226	Gerrit Kentner, Isabelle Franz, Christine Knoop and Winfried Menninghaus	Pause duration and other prosodic boundary cues are not monotonically correlated
2	40	Stefanie Keulen, Kat Dobson, Jidde Jacobi, Teja Rebernik, Martijn Wieling, Mark Tiede, Anna Jansen and Philippe Paquier	An electromagnetic articulographic investigation of feedback mechanisms in childhood apraxia of speech.
6	189	Seung-Eun Kim and Sam Tilsen	Temporal localization of syntactically conditioned prosodic information
9	50	Boram Kim	Acoustic and articulatory Correlates of lexical-stress in Mandarin accented English
1	218	Alexei Kochetov, Christophe Savariaux, Laurent Lamalle, Camille Noûs and Pierre Badin	Malayalam three-way rhotic contrast: Articulatory modelling based on MRI data
3	121	Laura Koenig, Areti Okalidou and George Kyriafinis	Comparing short- and longer-term measures of nasal coarticulation in Greek children with cochlear implants and normal-hearing peers
3	230	Anna Kohári, Uwe D. Reichel, Alexandra Markó and Katalin Mády	Breathiness in speech directed to 4-month-old infants
5	194	Hardik Kothare and Vikram Ramanarayanan	Remote monitoring of respiratory function using a cloud-based multimodal dialogue system
6	47	Jelena Krivokapic, Will Styler and Dani Byrd	The role of speech planning in the articulation of pause postures
1	201	Bernd Kroeger, Trevor Bekolay, Peter Blouw and Terence Stewart	Developing a model of speech production using the Neural Engineering Framework (NEF) and the Semantic Pointer Architecture (SPA)
3	109	Stella Krüger and Aude Noiray	Are developmental differences in vocalic lingual anticipation perceivable? Insights from German child and adult listeners.
7	192	Ajinkya Kulkarni, Ioannis Douros, Vincent Colotte and Denis Jouviet	Emotion recognition from phoneme-duration information
10	200	Harim Kwon	Do changes in shadowing predict those in subsequent productions?
2	41	Daniel Lametti and Douglas Shiller	Sensorimotor Learning and Transfer During English and French Sentence Production in Bilinguals
4	14	Adam Lammert, James Williamson, Nadee Seneviratne, Carol Espy-Wilson and Thomas Quatieri	A Coupled Oscillator Planning Account of the Speech Articulatory Coordination Metric With Applications to Disordered Speech
1	129	Leonardo Lancia, Jinyu Li and Louis Goldstein	Complexity patterns underlying speech production activity
10	131	Elise LeBovidge, Churan Li and Ludo Max	Toward understanding the limiting factors in speech auditory-motor adaptation: a new look at perceptual targets

2	15	Jasmine Lee, Annie Gilbert, Shanna Kousaie, Denise Klein and Shari Baum	Exploring the Relationship Between Prosodic Cue Production and Functional Connectivity in the Bilingual Brain
2	158	Jinyu Li and Leonardo Lancia	Speech production in response to multiple perturbations of auditory feedback
10	238	Vivian Guo Li, Sejin Oh, Garima Chopra, Joshua Celli and Jason A. Shaw	Articulatory correlates of morpheme boundaries: preliminary evidence from intra- and inter-gestural timing in the articulation of the English past tense
10	118	Yadong Liu, Terrina Chan, Gracellia Purnomo and Bryan Gick	Talking while smiling: Suppression in an embodied model of coarticulation
4	149	Mairym Llorens Monteserin	Variability in duration of Tourette's verbal tics that are temporally adjacent to speech
4	138	Daniel M. Low, Elyse Shenberger, Kate H. Bentley, Randy P. Auerbach, Stewart Shankman and Satrajit S. Ghosh	Automated assessment of mental health symptoms using audio and text features from speech
7	193	Elisabeth Lynn, Shrikanth Narayanan and Adam Lammert	Vocal Tract Shaping and Dark Tone Quality - An Investigation Using Real-Time MRI
4	59	Laura Machart, Anne Vilain, H��l��ne L��venbruck and Lucie M��nard	Influence of French Cued Speech on consonant production in children with cochlear implants: an ultrasound study
4	196	Yashish Maduwantha H P E R S, Carol Espy-Wilson, Deanna L. Kelly and Chris Kitchen	Inverted Vocal Tract Variables and Facial Action Units to Quantify Neuromotor Coordination in Schizophrenia
9	89	Alexandra Mark��, M��rton Bart��k, Tam��s G��bor Csap��, Tekla Etelka Gr��czi and Andrea Deme	Subsegmental differences between accented and unaccented vowels in Hungarian?
10	197	Sireemas Maspong and Francesco Burroni	Functional Load modulates speech production, but not speech perception: Evidence from Thai vowel length
2	107	Hilary Miller, Claire Cordella, Jessica Collins, Rania Ezzo, Megan Quimby, Jason Tourville, Frank Guenther and Bradford Dickerson	Evidence for a Phonological Output Buffer in Posterior Inferior Frontal Sulcus from Repetition Deficits in Primary Progressive Aphasia
1	142	Debasish Ray Mohapatra, Victor Zappi and Sidney Fels	A comparative study of two-dimensional vocal tract acoustic modeling based on Finite-Difference Time-Domain methods
9	178	Natalie Mosseri, Hadassa Dorville and Jenny Santiago	Teaching the expression of emotion in English to native speakers of tone languages: a gamified approach
6	116	Doris Muecke, Tabea Thies, Jane Mertens and Anne Hermes	Age-related effects of prosodic prominence in vowel articulation
10	18	Rintaro Ogane, Jean-Luc Schwartz and Takayuki Ito	Orofacial somatosensory inputs enhance speech intelligibility in noisy environments
5	88	Kohichi Ogata, Kento Yamamoto and Masami Ito	Usefulness of inverse estimation using a vocal tract mapping interface for estimating articulatory behavior
8	135	Miran Oh, Dani Byrd, Louis Goldstein and Shrikanth S. Narayanan	Velum-oral timing and its variability in Korean nasal consonants
10	219	Sejin Oh, Jason Shaw, Alexei Kochetov and Karthik Durvasula	Russian palatalization as incomplete neutralization
7	210	Asuka Ono, Momoko Nakatani, Ai Nakane, Junji Watanabe and Sadao Hiroya	Effects of vibrotactile stimuli on perception of voiced and unvoiced bilabial stop consonants in noise
2	58	Miriam Oschkinat, Simone Dalla Bella, Simone Falk and Philip Hoole	Sensorimotor Adaptation to Temporal Auditory Feedback Perturbation and its Relation to Motor Variability in General Timing Tasks
6	23	Lena Pagel, Simon Roessig and Doris M��cke	Modifications of tongue body kinematics as a focus marking strategy in German
7	237	Pertti Palo	Can we detect initiation of tongue internal changes before overt movement onset in ultrasound?

1	32	Yeonggwang Park, Manuel Diaz-Cadiz, Kathleen Nagle and Cara Stepp	Perceptual and acoustic assessment of strain using synthetically modified voice samples
7	235	Annalisa Paroni, Nathalie Henrich Bernardoni, Christophe Savariaux, Pierre Baraduc, Pascale Calabrèse and Hélène Lœvenbruck	Beatboxing, is it talking?
2	12	Benjamin Parrell and Adam C. Lammert	Modeling adaptation in speech motor control
2	68	Benjamin Parrell, Mark Tiede, Vince Gracco and Doug Shiller	Kinematic evidence of centering during vowel production
2	105	Benjamin Parrell and Caroline Niziolek	Formant variability is actively regulated in vowel production
10	72	Benjamin Parrell and Caroline Niziolek	Increased vowel contrast induced by adaptation to a non-uniform auditory perturbation in speech
6	205	Ludger Paschen, Susanne Fuchs and Frank Seifart	Phonological vowel length interacts with final lengthening
8	156	Maida Percival, Tamás Gábor Csapó, Márton Bartók, Andrea Deme, Tekla Etelka Grácsi and Alexandra Markó	Tongue root and voicing in Hungarian singleton and geminate obstruents
4	242	Caterina Petrone, Melody Zira, Christelle Zielinski, Elisa Sneed German and Noémie Moreau	Speech planning in question-response interactions from a clinical perspective
3	10	Linda Polka, Matthew Masapollo and Lucie Ménard	Setting the stage for speech production: Infants prefer listening to speech sounds with infant vocal properties
3	111	Anisia Popescu and Aude Noiray	Coarticulatory organization in beginner readers: a multifactorial interaction approach
8	66	Louise Ratko, Michael Proctor and Felicity Cox	Asymmetries in the kinematics of Australian English vowel gestures
5	6	Teja Rebernik, Jidde Jacobi, Roel Jonkers, Aude Noiray and Martijn Wieling	Experimental approaches in electromagnetic articulography
4	90	Virginie Roland, Véronique Delvaux, Kathy Huet, Myriam Piccaluga and Bernard Harmegnies	Imprecision of vowel production as a potential subclinical marker in Parkinson's disease
8	98	Kevin Roon, Philip Hoole, Chakir Zeroual, Shihao Du and Adamantios Gafos	Stiffness and articulatory overlap in Moroccan Arabic consonant clusters
2	97	Hannah Rowe, Marc Maffei, Sarah Gutz, Adam Lammert and Jordan Green	Profiling Speech Motor Control: Validation of Novel and Existing Acoustic Features
3	103	Elina Rubertus and Aude Noiray	Anticipatory and carryover coarticulation share a similar origin: evidence from child speech
3	113	Elina Rubertus and Anisia Popescu	Development of coarticulation: comparing modalities in beginner readers
1	96	Pramit Saha, Yadong Liu, Bryan Gick and Sidney Fels	Ultra-Arty-Synth - Articulatory Vowel Synthesis from Ultrasound Tongue
5	160	Pramit Saha, Debasish Ray Mohapatra and Sidney Fels	SPEAK WITH YOUR HANDS - Using Continuous Hand Gestures to control Articulatory Speech Synthesizer
10	216	Motoki Saito, Fabian Tomaschek and Harald Baayen	An ultrasound study of frequency and coarticulation
10	217	Motoki Saito, Fabian Tomaschek and Harald Baayen	Semantic measures determining coarticulatory movements of the tongue tip
10	145	Chelsea Sanker	Vowel Systems in Convergence

4	83	Ramona Schreier, Simone Dalla Bella, Philip Hoole and Simone Falk	Verbal timing deficits in stuttering
4	76	Benjamin Schultz and Adam Vogel	A machine learning algorithm to identify neuromuscular speech disorders from acoustic profiles
4	78	Benjamin Schultz and Adam Vogel	Automated extraction of voice onset time in healthy and pathological speech
4	164	Nadee Seneviratne, Carol Espy-Wilson, James Williamson, Adam Lammert and Thomas Quatieri	Classification of Depression by Quantifying Neuromotor Coordination Using Inverted Vocal Tract Variables
1	67	Konstantin Sering, Paul Schmidt-Barbo, Sebastian Otte, Martin V. Butz and Harald Baayen	Recurrent Gradient-based Motor Inference for Speech Resynthesis with a Vocal Tract Simulator
10	228	Hélène Serré, Amélie Rochet-Capellan, Marion Dohen and Susanne Fuchs	Speaking while moving: Does the head compensate for the hands not being able to move?
9	43	Antoine Serrurier and Christiane Neuschaefer-Rube	Towards articulatory comparison between French and German from MRI data
8	181	Christine H Shadle, Weirong Chen, Laura Koenig and Jonathan L Preston	Acoustic variability of fricatives in normal adults
8	100	Bowei Shao and Rachid Ridouane	Apical vowels' are not vowels: acoustic and ultrasound evidence from Jixi-Hui Chinese
6	42	Lia Saki Bucar Shigemori and Marianne Pouplier	Realization of F0 on vocalic and consonantal nuclei in Slovak
5	155	Ganesh Sivaraman, Nadee Seneviratne and Carol Espy-Wilson	Multitask learning based multi-corpus acoustic-to-articulatory speech inversion
4	63	Anneke Slis, Cecile Fougeron, Michaela Pernon and Leonardo Lancia	On the use of low-level spectral features to distinguish speakers with Parkinson's disease from typical speakers.
4	101	Anneke Slis, Christophe Savariaux, Silvain Gerber, Maeva Garnier and Pascal Perrier	Complexity of Rhythmic Tapping Task and Stuttering
10	55	Laura Smorenburg and Willemijn Heeren	The effect of phonetic context on speaker information in nasal consonants
1	69	Tanner Sorensen, Mark Tiede, Adam Lammert, Louis Goldstein and Shrikanth Narayanan	Fitts' law in tongue and lip movements of repetitive speech
2	144	Caroline Spencer, Jennifer Vannest, Suzanne Boyce, Edwin Maas, Jonathan Preston and Erin Redle	Neural changes in children with residual speech sound disorder (RSSD) after ultrasound biofeedback therapy
9	152	Laura Spinu, Jiwon Hwang and Nadya Pincus	Phonetic and Phonological Learning in Monolinguals and Bilinguals
7	157	Venkata Praneeth Srungarapu, Prमित Saha and Sidney Fels	Speed-Accuracy Trade-off In Speech Production
6	220	Rael Stanley, Marija Tabain, David Bradley and Defen Yu	Tone and Phonation in Northern Lisu
4	185	Maureen Stone, Natalie Miller, Ghady Alsaty, Lisa Honig, Joshua Lubek, Jiachen Zhuo and Jerry Prince	Does asymmetry in tongue anatomy affect asymmetry in tongue position? Glossectomy and control subjects.
5	16	Simon Stone and Peter Birkholz	Articulation-to-Speech using Electro-Optical Stomatography and articulatory synthesis
5	17	Simon Stone, Peter Birkholz, Atilla Azgin and Sabrina Mänz	Prospects of Articulatory Text-to-Speech Synthesis
10	39	Ching Chu Sun and Peter Hendrix	N-gram frequency effects on speech production in German and Mandarin Chinese

4	114	Tanya Talkar, James Williamson, Daniel Hannon, Hrishikesh Rao, Sophia Yuditskaya, Douglas Sturim, Kajal Claypool, Lisa Nowinski, Hannah Saro, Carol Stamm, Maria Mody, Chris McDougle and Thomas Quatieri	Assessment of Speech Subsystem Interactions in Children with Autism Spectrum Disorder
10	134	Monique Tardif, Jennifer Pardo and Tim Bressmann	Phonetic Accommodation to Hypernasal Speech
4	108	Tabea Thies, Doris Muecke, Richard Dano and Michael T. Barbe	Correlation between levodopa response and acoustic parameters of prominence marking as well as tongue body movements in patients with Parkinson's disease
1	54	Sam Tilsen and Anne Hermes	Nonlinear effects of speech rate on articulatory timing in singletons and geminates
8	206	Fabian Tomaschek	Positional variability of articulatory gestures: Effects of practice and linguistic proficiency
1	104	Asterios Toutios and Shrikanth Narayanan	Simulating anticipatory coarticulation in VCV utterances with a gestural articulatory synthesizer
7	222	Juergen Trouvain, Raphael Werner, Susanne Fuchs and Bernd Möbius	Exploring the presence and absence of inhalation noises when speaking and when listening
6	154	Pamela Trudeau-Fisette, Marie Bellavance-Courtemanche and Lucie Menard	Prosodic strengthening at the edges of prosodic boundaries in sighted and blind adult speakers
6	159	Karen Tsai, Jiyoung Jang and Argyro Katsika	The role of prominence in phrase-final lengthening: a cross-linguistic comparison
1	180	Anastasiia Tsukanova, Ioannis Douros and Yves Laprie	DNN-based parametric speech synthesis enhanced with articulatory information
7	123	Alexis Dehais Underdown, Paul Vignes, Didier Demolin and Lise Crevier Buchman	Human Beatboxing : A preliminary study on temporal reduction
2	175	Mariana Vasilita, Oonamaria Toussaint, Uliana Bernatska and Laura Spinu	Exploring the connection between phonetic learning and auditory sensory memory in monolinguals and bilinguals
2	19	Camille Vidou, Cristina Uribe, Tarik Boukhalfi, David Labbé and Lucie Ménard	Compensatory responses to real-time perturbation of visual feedback during vowel production
4	75	Adam Vogel and Benjamin Schultz	Features of speech and swallowing dysfunction in pre-ataxic Spinocerebellar Ataxia Type 2
2	143	Hantao Wang and Ludo Max	Does the extent of acoustic variability prior to an auditory perturbation affect motor learning in speech production?
6	28	Maolin Wang, Zhouyu Chen and Lijie Hua	A study on the pattern of focal lengthening in Chinese
10	64	Yamei Wang and Harim Kwon	Do nonwords induce convergence?
10	241	Heather Weston, Susanne Fuchs and Amélie Rochet-Capellan	Speech during light physical activity: Effect on F0 and intensity
10	5	Martijn Wieling, Mark Tiede, Teja Rebernik, Lisanne de Jong, Anouck Braggaar, Martijn Bartelds, Masha Medvedeva, Penny Heisterkamp, Tom Freire Offrede, Hedwig Sekeres, Anna Pot, Mara van der Ploeg, Karin Volkers and Gregory Mills	A novel paradigm to investigate phonetic convergence in interaction
4	162	Noé Xiu, Béatrice Vaxelaire, Jean-François Rodier, Pierre-Philippe Volkmar and Rudolph Sock	Post-thyroidectomy and Perturbation of Aerodynamic and Acoustic Parameters
3	130	Melissa Xu, Asterios Toutios, Tanner Sorensen and Shrikanth Narayanan	Using real-time MRI to assess the development of jaw contribution in constriction formation synergies during early adolescence
5	34	Kele Xu, Tamás Gábor Csapó, Dawei Feng and Haibo Mi	Ultrasound Tongue Gestural Sequence Classification Using Convolutional Auto-encoder and Recurrent Neural Network
8	31	Tsukasa Yoshinaga, Kazunori Nozaki and Akiyoshi Iida	Relationships between turbulent flow configuration and sound source location of Japanese sibilant fricatives
